

Features / Benefits

- Built to transport products of various sizes and shapes
- Ideal for small parcels or airport baggage
- Maintains product orientation through the curve
- Rapid start / stop capability
- Wide conveying widths available
- External bearings for easy maintenance
- Low belt tension for long component life
- Rugged steel construction
- Positive belt drive means no end roll slip
- Custom design available for specific applications

Specifications

- Loads up to 600 lbs.* (272 Kg)
- Belt speeds up to 650 fpm / 3.30 mps
- Outside conveying radii from 27" / 700 mm to 956" / 24 meters
- Conveying widths from 7" / 200 mm to 110" / 2.8 meters
- Arcs from 11° to 357°
- Frame sides and slider bed are 10 gauge (3.42 mm) steel
- Welded 4.83 mm angle steel crossmembers
- Sideguard construction is 14 gauge (1.89 mm) steel standard with 12 gauge (2.65 mm) steel optional.
- A wide range of belt material is available for almost any application

**Conveyor load capacity depends on conveyor size, motor position, accumulated loads and other factors.*
